

Date: December 7, 2023
Applicability: Babel Fish
Issued By: Jack Rader
InTouch: 8098481

BACKGROUND INFORMATION

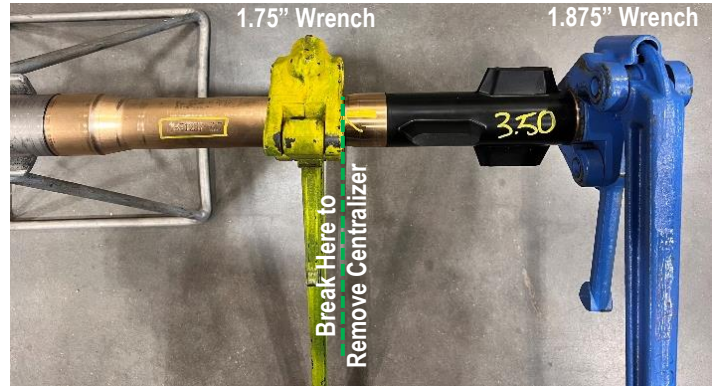

To help reduce the risk of breaking shop connections and damaging internal components a series of images showing proper wrench placement have been organized below.

Female End

Male End

**Remove attached probe from female end
with centralizer removed**

**Remove attached probe from male end
with centralizer installed**

MOVING FORWARD

This bulletin will be included in all Babel Fish kits for future reference. The Extreme Command Center will also have it on hand to distribute upon request.
